

Get New Joy from Your Old Furniture

We refurbish your furniture to suit your current needs. We offer customized solutions, both in terms of special measurements and the reuse of what you already have. Therefore, you can have an office solution exactly as you want it.

In a business, needs change constantly, and it is also crucial for most to make a good and professional first impression when clients or collaborators enter the office. The interior should ideally appear modern and welcoming, but replacing furniture every time trends change is costly for both your wallet and the environment.

Enter DC Office Furniture!

We are happy to deliver brand-new office furniture that can last for many years, but when you contact us, our first step is to understand the core of your needs. Do you need new furniture everywhere, or can some of the existing ones be optimized and reused?

We specialize in optimizing your existing furniture to meet both your new needs and your image. Do you have a functional frame but a tabletop you don't like? If the quality and estimated "lifespan" of the frame are good enough, it can be worthwhile.

[See our brochure on getting new joy from your old office furniture here.](#)

Price Example 1 – Height-Adjustable Desk:

New height-adjustable desk:

Market price 4000-4500 + cable tray at approx. 400 = 4900 + VAT

Renewal of height-adjustable desk:

New tabletop approx. 1500 + disassembly/assembly at approx. 500 + VAT

Reuse of existing cable tray.

Possible additional option: disposal of old tabletop: 195 + VAT (it goes directly to wood recycling and is not just sent to incineration).

= 2000

Potential cost savings: 2900 + VAT

You always receive a detailed quote, so you can feel confident in the decision before we start.

Price Example 2 – Office Chair:

Is your office chair sinking?

It is likely just a new gas cylinder or gas stem you need. In comparison, a new good office chair easily costs 3500 + VAT.

New gas cylinder for office chair:

A new gas cylinder normally costs 700 + disassembly/assembly at approx. 500 at our workshop in Ishøj. The assembly price is for one chair; if you have more chairs, the assembly becomes cheaper per unit.

If you can't bring in the chair, we can also come to you. The cost of transportation depends on where the task needs to be performed. In Greater Copenhagen, the cost is: 595 + VAT

Included in the above: wheels and other functions are lubricated. Disposal of the old cylinder for recycling.

Other examples can include:

- Replacement of the gas cylinder on your office chair if it is too low/high or just collapsing
- New seat cushion if the fabric is worn or reupholstering of meeting chairs
- Installation of screen dividers on tables, instead of building walls in the office
- A beautiful new top for existing shelves/cabinets if they have become worn and scratched.

Does this sound like something for you? [Contact us today, and let's have a chat](#) – we are happy to provide a non-binding offer.

Below, you can read about one of our renovation projects:

The customer wanted a new layout for the open-plan office, making it more streamlined and optimized in relation to the size of the desks for the staff's various tasks.

Instead of just delivering complete and new desks, we quickly realized that we could advantageously reuse 18 out of 19 height-adjustable frames and simply install new tabletops.

This meant that the task was a significantly smaller investment than expected. The savings led the customer to also invest in an extra good desk lamp for each employee, and a drawer was mounted under each desk for storing things that would otherwise just be lying around at closing time.

Our office layout made it possible for all cables to be tied up and led to the desks, so there is no unnecessary cable clutter in the future.

The old tabletops have been delivered to an environmental station for recycling into new wood products.

The result has been very good in terms of furniture expertise, the customer is satisfied, and the users have a more straightforward everyday life – PLUS, we have saved the environment from a lot of unnecessary resources.
